Dr. Connealy began practicing medicine in 1986. In 1992, she founded the Center for New Medicine in Irvine, California, where she serves as medical director. Her practice is firmly based in the belief that strictly treating the health problems with medications does not find the root cause of the illness. Dr. Connealy soon realized that conventional medicine had very limited returns and did not always improve the health of her patients. Her patients were hungry for alternative approaches for improving their health. This led her to study integrative and complementary therapies. She believes that we must treat the patient with the disease and not just the disease of the patient. Dr. Connealy has an outpatient cancer treatment center right on site in association with Oasis of Hope USA; she has come to realize the importance of cancer prevention health care. She has become a foremost integrative cancer expert and utilizes low-dose insulin-potentiated chemotherapy, which has few to no side effects, as well as genetic testing through RGCC labs to determine the exact effective therapies, alternative and chemotherapy. Dr. Connealy is frequently featured in magazines, is a guest speaker at professional organizations, and is on cable television shows highlighting health topics such as *Know the Cause*. She is a frequent writer for Natural News and Newport Natural Health. Additionally, for 10 years she was a weekly cohost on Frank Jordan's national radio show *Healthy, Wealthy and Wise* on Sirius XM.
