

Mastic Gum/DGL

Supports healthy digestion and
gastrointestinal function.

Mastic Gum/DGL is a cinnamon flavored chewable tablet supplying *Glycyrrhiza glabra* (Deglycyrrhizinated Licorice, DGL) and *Pistacia lentiscus* (mastic gum) to support healthy digestion and gastrointestinal function. This product can help alleviate gastrointestinal discomfort associated with:

- Occasional heartburn and acid reflux
- Everyday indigestion and discomfort of the GI tract
- Gastric erosions, especially when associated with *Helicobacter pylori*

Studies have established the positive effects of mastic gum in maintaining the health of the gastric and duodenal lining as well as supporting bacterial health in the oral cavity and the gut. Deglycyrrhizinated Licorice (DGL) extract has had glycyrrhizic acid removed, which is a safer form of licorice to consume. It has been shown to help inhibit gastric acid secretion, increase blood flow to gastric mucosal cells, promote secretion of the protective mucosal layer, and stimulate the growth of new mucosal cells.
