

BioDisrupt™

Triple Action Support

Mechanisms of Action

- Promoting a healthy extracellular matrix*
- Supporting ideal cellular communication*
- Reinforcing normal microbial balance*

BioDisrupt™ supports the healthy immune system's ability to target the sophisticated self-defense mechanisms of unwanted extracellular organisms. These organisms have developed a series of advanced mechanisms which allow them to evade immune detection. As part of this system, these organisms assemble into clusters, surround themselves with protective physical matrices and communicate among themselves.
